

# ABSTRACT

Disclosed is a cleaning solution comprising, based on the total weight of the solution: (a) more than 50% by weight of at least one lactone (component A); (b) and 1 to 10% by weight of at least one surfactant compound (component B) having a HLB ranging from 8 to 15 and selected from the group consisting of compounds of formula

wherein:  $\text{R}_1$  denotes a hydrocarbon group comprising from 1 to 20 carbon atoms;  $n'$  is an integer from 1 to 5, X denotes a valence link, -O-, -OCH<sub>2</sub>, C=O or (CH<sub>2</sub>)<sub>k</sub>, k being an integer varying from 1 to 2; Y denotes (RO)<sub>j</sub>H wherein j is an integer ranging from 2 to 40, and R is a divalent hydrocarbon group, and compounds of formula

$$\text{CH}_3(\text{CH}_2)_l - \text{O} - (\text{CH}_2\text{CH}_2\text{O})_m - \text{H} \quad (\text{II})$$

wherein l is an integer from 6 to 13 and m is an integer from 3 to 15.
